

FOR IMMEDIATE RELEASE

Case Medical, a 2023 U.S. EPA Safer Choice Partner of the Year
manufacturer/formulator of safer, environmentally preferred instrument chemistries

Bloomfield, NJ – October 3, 2023 – Case Medical, Inc., a NJ manufacturer of medical devices and cleaning solutions, was selected as a 2023 [Safer Choice Partner of the Year](#) by the [U.S. Environmental Protection Agency \(EPA\)](#). The award marks the sixth time Case Medical has been recognized by the EPA for outstanding achievement in the manufacture and formulation of chemical solutions that are equal to or better than products in their class and proven safer for people and for the environment.

“Consumers are looking for sustainable products for economic as well as environmental reasons,” said Marcia Frieze, CEO of Case Medical. “As we face climate change, water shortages, and concerns associated with air quality and fresh water, the need for sustainable products and manufacturing processes is more urgent than ever. Receiving the [Safer Choice Partner of the Year Award](#) reflects our deep support for EPA’s mission to reduce waste and provide safer, sustainable products for current and future generations.”

The partnership with EPA started in 2011 initially with the Design for the Environment (DfE) program. Subsequently in 2015, the company furthered its partnership with The U.S. EPA under the Safer Choice program. During 2020, facing the pandemic and shortage of supplies for infection prevention, the company extended its product line to include the Case Care® brand of cleansers, and single use wipes. Case Medical’s environmentally preferred instrument chemistries were originally developed for use in healthcare, contributing to patient safety and best practices. Now Case Medical’s cleaners and cleansers are available and applicable for industrial, commercial, and home use. Case Medical believes in standardization and reducing the chemical footprint with products safer for people, pets, and the planet.

Case Medical’s [Case Solutions® and SuperNova® brand cleaners](#) are formulated to be highly effective, free rinsing, pH neutral and non-corrosive, with eco-friendly enzymatic catalysts included for extra efficacy. In fact, only US EPA approved ingredients are used in the formulation of the company’s instrument chemistries and cleansers. Additionally, Case Medical’s cleaning solutions have demonstrated in multiple laboratory studies with the USGS and independent laboratories to have infection prevention properties and to potentially reduce microbial activity. In June 2020, the company was granted a U.S. and Canadian patent for effectively de-activating infectious prions, the proteins responsible for neurological and wasting diseases in humans and animals.

The EPA Safer Choice Partner of the Year award winners represent a wide variety of leadership organizations, including Fortune 500 companies, small and medium-sized businesses, state governments, and non-governmental organizations. The 2023 Safer Choice Partner of the Year Awards were announced Monday, October 2nd, by the U.S. EPA.

Case Medical is an FDA registered, ISO certified manufacturer of validated, sustainable, and cost-effective products for instrument processing. The company's SteriTite, reusable sterilization containers, and instrument chemistries meet the highest standards for patient safety and environmental preference. Case Medical is a Tier-1 Diversity Supplier and was an inaugural recipient of the U.S. EPA Safer Choice Partner of the Year award. Visit our website www.casemed.com for more information about our company and our products for infection prevention.
